Risk management requires more and more controls and monitoring. • Financial Communication The CFO must consolidate heterogeneous data from disparate systems. • Cost cutting The CFO, like other functions, must do more with less or same resources. • Financial performance management Manage of all activities and places of business and financial performance: CFO must play a major role in aligning the operational activities and business strategy.
<p><i>Target Market</i></p>	<p>Ideally suited for medium and large size national or international companies</p>

Sage ERP X3 v6.2 Datasheet

	<p>with 250 to over 3,000 employees, Sage ERP X3 is fully adapted to suit all kinds of activities and organisations.</p> <ul style="list-style-type: none"> • Markets: Companies working in "Process Manufacturing", "Discrete manufacturing" and in distribution, especially wholesale, as well as service companies. • Multiple organisations: For groups, international subsidiaries of groups, multi-company/site organisations, with several logistics and manufacturing sites, looking to streamline operations, enhance collaboration, drive efficiency, and increase business insight with a rapid to deploy solution that has low total cost of ownership.
<p><i>Key Features</i></p>	<ul style="list-style-type: none"> • Finance General, analytical and budgetary accounting, multi-company, multi-site, multi-legislation, multi account plans and multi-currency, management of expenses and budgets, Fixed Assets management. Management of due payments and recovery, management of settlement and factoring. A company can be managed simultaneously with several dedicated or shared account plans, where each one can meet specific needs, for example localisation, accounting standards, activity and business. Finance departments will also benefit from analysis and reporting views to give them an overview of activities across all of the group companies. Additional modules extend the functional coverage into areas such as consolidation, treasury, banking communication and credit management. • Business Intelligence Business intelligence tools for management have become essential for analysing and measuring the company's key data: sales performance, by client or product, charge accounts or analysing manufacturing costs. Fully integrated into the ERP, this tool is used to collect, consolidate and review company data to help in decision making and to provide the company's strategic managers with clear overview of the entire business activities. • Technology partnerships with third party authors (ISVs) Connectors to ISV solutions are fully integrated into Sage ERP X3 and make it possible to extend the offer's functional coverage in order to meet the varied challenges of our customers. <ul style="list-style-type: none"> ◦ EDM (Electronic Document Management) Docubase partner. EDM manages the acquisition, classification, storage and archiving of documents. In this way the document's life cycle can be managed via various processes. Depending on access rights the user can access documents directly from within Sage ERP X3. EDM is becoming a real collaborative work tool.

	<ul style="list-style-type: none"> o LAD (Automatic document reading) Readsoft partner. <p>With this solution it is possible to simplify and automate the processing of supplier invoices delivered by scanning or as electronic files. Billing elements are then integrated into the finance system so they can be processed by the automatic reconciliation tool. Data management optimises document circulation. This system brings great savings in time and processing costs which will bring more added-value to accounting roles.</p>
<p><i>Key Customers</i> <i>Benefits</i></p>	<p>Designed to help businesses increase agility, responsiveness and productivity, Sage ERP X3 is characterised by its ability to automate any type of process and adapt quickly to all kinds of situations.</p> <ul style="list-style-type: none"> • Supports your company's growth and development: <ul style="list-style-type: none"> o Adapts as your company evolves. Sage ERP X3 is key to improving enterprise flexibility. Sage ERP X3's modular and flexible structure can be adapted to suit all kinds of organisations. Whether the business is a group of companies or is organised across many manufacturing or logistical sites, Sage ERP X3 supports your company both at a local and international level. Sage ERP X3 is used by over 2,700 clients in over 50 countries (particularly in the USA, UK, France, Germany, Spain, China, North African countries, South Africa, Australia, Canada and the Middle East). o Facilitating change management: reorganising a system means that all employees have to make changes to their routines, and the information system is often at the heart of these changes. Through configurable graphical processes, Sage ERP X3 makes it easy to implement these new procedures for each role within the company. Employees are guided through the process, access to functions is learnt easily with a tool that is very easy to get to grips with. Changes is implemented quickly and productivity improvements can be immediate. • Maximises staff productivity: <ul style="list-style-type: none"> o Global view of your activities: Sage ERP X3 helps companies to manage their activities. The business intelligence tool provides relevant analyses, enabling you to define and track the key indicators of the activity and identify areas for improvement so that you can make well reasoned decisions and react more effectively to new business opportunities • Reduces risks: <ul style="list-style-type: none"> o Compliance with regulations: Sage has been the leading author of business management software for over 20 years. Sage has always anticipated risks to guarantee the integrity of all its solutions' processes. Sage ERP X3 helps companies to manage their legal obligations, through its wide range of accounting solutions which cover many countries, taking into account security

	<p>and traceability related regulation (Sarbanes Oxley). More than 12 legislations are available, including Germany, Argentina, China, Spain, France, Italy, Portugal, United Kingdom and the USA. With its sophisticated traceability functions audits can be prepared or carried out very simply.</p> <ul style="list-style-type: none"> • Reduces lead times <ul style="list-style-type: none"> ○ Collaborative work with ecosystem, Developed with cutting edge technology, Sage ERP X3 is designed with Web and SOA architecture. With this architecture, collaborative work processes can be implemented with all of the company's internal or external players. A third party may access all or part of your information system securely using a simple web browser. A workflow engine is at the heart of process automation and provides many options, notably setting up automated alerts and decentralised signature processes. What's more, Sage ERP X3 has a collaborative portal which provides access to a customised work area (menu, indicators) which is fully linked to the web via RSS information flows and any URL. It is tightly integrated with MS Office which makes it easier to exchange and manage non-structured information. • Keep costs under control <ul style="list-style-type: none"> ○ Reduce your TCO - Sage ERP X3 has been designed to make it simpler to set up and use. An integrated, modular design means that functions can be implemented in direct line with the specific issues facing the company. Pre-configurations and a library of over 300 reports save time when setting up. Sage's implementation methodology ensures that your objectives and lead times are met. Sage ERP X3 is both quick to set up and has keeps running costs at a very low cost. ○ Keep your operating costs under control - with its extensive automation and optimisation of processes, Sage ERP X3 will help reduce your administrative costs. Implementation of best industry good practices and real time overview of activities mean you can optimise stock, costs and customer service levels to ensure a quick ROI.
<p><i>Value proposition</i></p>	<p>For Sage you, our customers, have always been at the heart of our strategy. Keeping close to and listening to our customers shapes the development and service strategy around Sage ERP X3.</p> <p>Our value proposition is to:</p> <ul style="list-style-type: none"> • Implement ambitious ERP solutions, which up until now were reserved for very large companies, but at a low cost for companies with limited IT resources. • Offer intuitive and very simple-to-use solutions so that employees can get to grips with the tool quickly, so it can be used to the full in all activities. • Reduce implementation lead times to a minimum to enable our clients to benefit quickly from the solution • Make change and evolution easy - understanding the job roles and the
